KAILASH SARAVANAN

Junior Azure DevOps SRE Engineer

Chennai, Tamil Nadu, India | +91 9361772822 | kailashsaravanan8@gmail.com | linkedin.com/in/kailashsaravanan627963213

PROFESSIONAL SUMMARY

AZ-104 certified Azure engineer with hands-on experience deploying and administering Azure infrastructure (Virtual Machines, Storage, VNets, IAM/RBAC) and AWS environments (EC2, S3, RDS, VPC, Auto Scaling, CloudWatch). Comfortable navigating live cloud subscriptions via portal and CLI, writing Bash/PowerShell automation for routine tasks, and using Git for version control. Experienced administering Windows and Linux server fleets, reading logs and monitoring data (CloudWatch, Azure Monitor) to investigate failures, and applying structured troubleshooting with clear escalation judgement. Background running ITSM workflows in ServiceNow (incident, change, and problem management), leading Root Cause Analysis on production issues, and maintaining strict SLA compliance while collaborating with global cross-functional and client teams during live cutovers. Exposure to Infrastructure as Code (Terraform, Ansible), Docker, and Kubernetes fundamentals. Strong written English for status updates, RCA notes, and documentation. Available and willing to work a sustained Monday–Friday night shift aligned to US business hours.

TECHNICAL SKILLS

Cloud Platforms: Microsoft Azure (AZ-104 Certified) — compute, storage, resource groups, portal & CLI; Amazon Web Services (AWS)

CI/CD & Version Control: Git (branching, pull requests, merge conflict resolution, release tagging); GitHub Actions; exposure to pipeline concepts through IaC-driven deployments; comfortable reading/modifying configuration-as-code

Scripting & Automation: Bash & PowerShell automation (task-level scripting), Python (Flask development)

Linux & Windows Server: Server navigation, service checks, log review, and basic troubleshooting across RedHat/Ubuntu and Windows Server

Containers: Docker fundamentals; Azure Container Registry & Azure Container Apps; working knowledge of Kubernetes/AKS concepts

Monitoring & Logs: Azure Monitor, Application Insights, Log Analytics, AWS CloudWatch; log-driven failure investigation and evidence-based troubleshooting

Networking & Identity: Azure VNets/NSG concepts, AWS VPC design, IAM/RBAC, Route53

Infrastructure as Code: Terraform, Ansible, Azure Resource Manager (ARM) templates, Azure Key Vault

ITSM & Collaboration: ServiceNow (Incident, Change & Problem Management) — equivalent tooling to JIRA/Azure Boards; RCA authorship; SLA management; cross-functional and overseas stakeholder coordination

Virtualization & Migration: VMware vSphere, VMware HCX, Txture, on-premises to cloud migrations

PROFESSIONAL EXPERIENCE

Infrastructure / Cloud Engineer — Birlasoft *Aug 2025 – Present | Chennai, India*

- Executed end-to-end enterprise infrastructure migration projects, leading VMware vSphere on-premises to on-premises and hybrid cloud migrations while ensuring 100% data integrity and minimal downtime.
- Conducted pre-migration assessments, dependency mapping, and workload sizing for multi-tier applications using Txture, reducing post-migration anomalies by 35%.
- Architected, deployed, and configured core Azure infrastructure — Virtual Machines, Storage Accounts, Virtual Networks (VNets), and IAM/RBAC policies — navigating live Azure subscriptions via portal and CLI.
- Administered Windows Server and Linux fleets: checked services, reviewed logs, monitored performance benchmarks, and executed routine maintenance and troubleshooting.
- Managed Level-2/3 infrastructure incidents and service requests in ServiceNow, maintaining greater than 99.5% SLA compliance and exercising structured escalation judgement.
- Led Root Cause Analysis on high-impact production incidents, authoring clear technical RCA reports and implementing fixes that decreased recurring tickets by 25%.
- Executed relocate, replatform, and in-place upgrade migration strategies across on-premises environments, ensuring compatibility across enterprise software stacks.
- Collaborated with global stakeholders and cross-functional engineering teams during live production cutover windows, delivering status updates and documentation for client engineering teams.

AWS Cloud Intern — Cholamandalam Investment & Finance Ltd *Jun 2024 – Jul 2024 | Chennai, India*

- Provisioned and maintained fault-tolerant AWS infrastructure using EC2, S3, RDS, IAM, and Route53 to support high-concurrency internal financial applications.
- Designed VPC architectures with public/private subnet isolation, NAT Gateways, and Security Group rules for defense-in-depth security.
- Configured Auto Scaling Groups integrated with CloudWatch metrics and Load Balancers, optimizing compute spend by 18% while maintaining elasticity during traffic spikes.
- Performed remote Linux server administration and command-line troubleshooting via MobaXterm, resolving SSH connectivity, storage mounting, and OS-level configuration issues.
- Diagnosed and remediated cloud networking issues, security group misconfigurations, and IAM permission conflicts using log and monitoring data.

KEY PROJECTS

CloudOps Service Desk | Azure DevOps & SRE Project

- Developed a Python Flask-based REST API application with health monitoring and application information endpoints.
- Containerized the application using Docker and managed image lifecycle through Azure Container Registry (ACR).
- Provisioned Azure infrastructure using Terraform, including Resource Groups, Container Registry, Container Apps, and Key Vault.
- Designed and implemented CI/CD pipelines using GitHub Actions for automated build, validation, and deployment workflows.
- Deployed the application on Azure Container Apps and configured environment-based application settings.
- Implemented secure secret management using Azure Key Vault and Azure RBAC following least-privilege access principles.
- Performed troubleshooting of CI/CD failures, container deployment issues, registry authentication errors, RBAC permission issues, and application connectivity problems.
- Integrated Azure monitoring services including Application Insights and Log Analytics for observability and operational visibility.
- Documented operational procedures, troubleshooting guides, incident response workflows, and Root Cause Analysis (RCA) reports following SRE practices.

Technologies: Python, Flask, Git, GitHub, GitHub Actions, Docker, Terraform, Azure Container Registry, Azure Container Apps, Azure Key Vault, Azure RBAC, Application Insights, Log Analytics.

Disaster Alert Mobile Application — Research Project, Loyola College

- Led a multi-member team building a high-availability mobile app for real-time disaster management, integrating an AWS backend (Lambda, DynamoDB) to process alerts instantly.
- Engineered offline SOS signaling with real-time GPS tracking for connectivity-independent distress broadcasting.

Personalized Book Recommendation System — Full-Stack Project

- Built a full-stack web app (JavaScript, HTML5, CSS3) with rule-based recommendation logic and Supabase (BaaS) for authentication and real-time data sync.

NOTABLE ACHIEVEMENTS

- Star Performer – Internship (Birlasoft, 2025): Awarded top performer recognition for leading three cloud automation initiatives and exceeding all delivery targets within the intern cohort.
- Appreciation Award (Birlasoft, 2025): Recognized by senior leadership for strong performance on a cloud migration project, including effective client communication, ownership of deliverables, and consistent on-time delivery under tight deadlines.

EDUCATION

Loyola College, Chennai, India — Bachelor of Computer Application (BCA), CGPA 7.9/10.0, 2022–2025

Velammal Matriculation Higher Secondary School, Chennai — Class 12, Commerce & Business Mathematics, 88%, 2022

CERTIFICATIONS & LANGUAGES

Certifications: Microsoft Certified: Azure Administrator Associate (AZ-104); Microsoft Certified: Azure Fundamentals (AZ-900); AWS Virtual Internship; Cisco Introduction to Cybersecurity.

Languages: English (Professional Working Proficiency); Tamil (Native/Full Professional Proficiency); French (DELF B1 Certified – Alliance Française).
